### Steel-structured halls, shelters and customized steel structures.

Raahen Teräsraakenne delivers steel structures according to the customer's blueprints. Alternatively, we can also handle the structural engineering and customize the product according to the customer's wishes. The customer is responsible for acquiring the proper construction permits and supervisors. Additional services, such as installation and foundations, can also be delivered according to the customer's wishes.

#### We deliver:

- Production plants
- Storage buildings
- Farm buildings
- Barns
- Machine shelters
- Stairs
- Service platforms

#### Steel structure delivery

- The extent of the delivery is determined by the customer's request for quotation
- frame structures are made of steel
- surface finishing for steel structures: hot galvanizing or painting
- installation if necessary

Steel structures for various uses.
